

Development Team Leader – Large Software Redevelopment Project**Buckinghamshire, High Wycombe**

Development Team Leader – Large Software Redevelopment Project (.NET, ASP, C#, PHP, LAMP)
Bourne End, Buckinghamshire (Near High Wycombe)
c£40,000 DOE

As the preferred supplier to the transport industry, our client provides complex back office and real-time fleet tracking solutions that are used by hundreds of companies in the logistics and transport sectors. An opportunity has arisen for a Development Team Leader to join their team.

This exciting position would suit a talented developer with a broad range of skills, looking to get involved with a major web-based greenfields development project that provides the chance to completely redevelop a system under their own guidance

As a Development Team Leader, you will be responsible for redeveloping our client's transport management system. Initially, you will work alone although over time, you will be required to build a team of developers around you, which means this role requires hands-on development skills coupled with strong leadership abilities.

The current system is written in Delphi, but depending on your skill set, you will choose what tools are best for the new system. This means specific development skills aren't important, however you must have broad skills in both .NET/ASP/C# (Microsoft development tools) and LAMP/PHP (Linux, open source development tools).

Your duties will include:

- Taking conceptual requirement ideas and turning into technical design specifications
- Researching new technologies/products to ensure you're using the most appropriate tools
- Developing code from specifications
- Delegating work from specifications to other developers, and overseeing this work
- Testing developers' code to ensure standards are being met
- Planning activities and providing updates to the Development Manager

To be considered for this position, you must have:

- Proven commercial development experience
- The ability to design as well as code
- Familiarity with scalable systems

As the Development Team Leader, you should also be an effective communicator with the ability to inspire your team. Any management or team leadership experience would be beneficial to your application.

The ideal candidate will also thrive under pressure and will relish the unique opportunity this role presents.

This role is based at our clients' offices in Bourne End, South Buckinghamshire, which is near to High Wycombe.

To apply for the role of Development Team Leader (.NET, ASP, C#, PHP, LAMP), please simply send your CV and a covering letter via the button shown. If your skills and experience meet with any of our client's requirements and/or needs, we will provide our clients with your full details so that they can consider whether you may be suitable for the vacancy advertised. Your details, as submitted by you, will only be used in conjunction with this vacancy. By submitting your CV and cover letter to us, you give express consent to us using your details for this purpose.
