

IT Systems Trainer / Software Tester – c£30K

Buckinghamshire, High Wycombe

IT Systems Trainer / Software Tester  
Bourne End, Buckinghamshire  
c£30,000 DOE

As the preferred supplier to the express transport industry, our client's software includes real time fleet tracking solutions and is used by hundreds of companies in the logistics and transport sectors. An opportunity has arisen for an IT Systems Trainer / Software Tester.

As an IT Systems Trainer / Software Tester you will be responsible for delivering training on the company's bespoke products, primarily to clients, but also to new starters within the business. Travel to client sites around the UK will be required (principally in the South of England).

Although this is primarily a training role, you will also be required to become an expert on all areas of the company's products and undertake some testing duties. Rather than focusing on QA, you will be required to use your expertise to identify issues with new versions of the software before it is released.

Day to day, your duties will include:

- Assessing training needs for external clients and internal members of staff
- Designing, creating and delivering training courses, based on assessment of training needs
- Organising training venues and logistics as necessary to facilitate efficient training delivery
- Writing and carrying out test plans for new releases of the company's software products
- Testing and fault finding new releases prior to release

To be considered for this position you must have previous commercial experience in an IT training/technical training role. You will also need to demonstrate excellent communication skills and the ability to lead classroom/presentation style situations.

As the IT Systems Trainer / Software Tester you should also be extremely personable with a clear focus on providing high quality customer service. A good level of proficiency using the MS Office suite is also essential, as is a UK driving licence.

This role is based at our client's offices in Bourne End, South Buckinghamshire which is near to High Wycombe. The ideal candidate will live within sensible commuting distance or will be willing to relocate.

To apply for the role of IT Systems Trainer / Software Tester, please simply send your CV and a covering letter via the button shown. If your skills and experience meet with any of our client's requirements and/or needs, we will provide our clients with your full details so that they can consider whether you may be suitable for the vacancy advertised. Your details, as submitted by you, will only be used in conjunction with this vacancy. By submitting your CV and cover letter to us, you give express consent to us using your details for this purpose.
